Summary

Test Professional with hands-on experience in web application - UI, Functional, Regression testing and Automation testing. Highly organized, versatile and result-oriented team player with an energetic and articulate approach to testing. Ability to acquire new skills within a short time span and adapt to rapidly changing work practices. Passionate about technology, learning new things and helping others to work better and more effectively. Currently, working as a Test Engineer at InApp Information Technologies. Well acquainted with the Software Testing Life Cycle and the process followed from requirement analysis till deployment.

Professional Summary

- An **ISTQB certified** dynamic professional with **2 years** of experience in software testing.
- Performing testing activities [**Automation & Manual**] and ensures the project is delivered bug-free on time with quality.
- Knowledge in **Agile** process and methodology.
- Have good work experience in the area of manual testing (Functional testing, System testing, Sanity/Smoke testing, Regression testing, Exploratory Testing, Compatibility testing, GUI testing, Usability Testing etc.)
- End to end testing for business processes in client-server & web-based applications.
- Efficient in preparing Test Cases, Test Plan, Execution and Bug Tracking.
- Knowledge in XPath expressions
- Have good knowledge in using Defect Management Tools like **VSTS, JIRA, Mantis**.
- Experience in all phases of **Software Testing Lifecycle (STLC)**

QA Expertise

- User interface and Business Requirement Analysis
- System Specification Analysis, Testing Methodology
- System Testing, Functional, Regression, Performance, Usability, Integration and GUI Testing
- Involved in POC's for Automation using Katalon Studio
- Bug tracking & reporting using TFS and Mantis
- Experience in Mobile Application testing in iOS & Android
- End to end testing for business processes in web-based applications
- Domain experience in ERP, Spiritual, Video Streaming Applications, Sales

Technical Competencies

Automation Tool	: Katalon Studio
Development tools and Languages	: Groovy
Browsers	: Internet Explorer, Mozilla Firefox, Chrome, Safari, Edge
Operating Systems	: Linux, Windows, Mac
Source Control	: Git
Bug Tracking Tool	: VSTS, Mantis, JIRA

Professional Experience

February 2017 – Till Date

InApp Information Technologies, Trivandrum – Test Engineer

Projects Handled

Project 1 : Alcami

The Alcami Customer Portal (ACP) can host multiple valued-added custom applications (called modules) for Alcami customers. The stages of this project will focus on customer onboarding & management and an initial module: Lab Sample Submission. The application is supported by iOS, Android mobiles & desktop browsers.

Role : Testing(Manual & Automation) - Web, Android, iOS

- Prepare & execute test cases
- Test Case & Test Plan Preparation
- Perform test execution in all phases of testing, including functional, regression, usability, UI, integration & acceptance
- Report bugs into the bug tracking system with clear and detailed steps to reproduce
- Requirement/Change request analysis and generate test cases based on the requirements
- Reporting bugs and retesting the resolved cases
- Identifying and Scripting of automatable test cases in Katalon Studio
- Updating the test scripts based on the change requests and new requirements
- Object Repository management in Katalon Studio
- Perform Smoke & Sanity testing
- Manual Testing - Prepare & execute test conditions
- Log issues in bug tracking tool
- Preparation of test completion report
- Participate in Requirement review meeting
- Provide estimation for the tasks
- Testing in both Integration phase and UAT phase
- Troubleshoot and analyze application issues to root cause where possible
- Effective client interaction & provides suggestions
- Participation in audits and reviews of testing, highlighting areas for improvement
- Involved in peer review of automation tasks

Project 2 : JGH - Junior Golf Hub

Junior Golf Hub was founded to help players and parents navigate the journey to college golf while helping coaches find top talent. Players create profiles that are searchable by the coaches, 'Find and Follow' college golf programs and receive education on the do's and don't's of the recruiting process. College coaches find and filter the top talent they are looking for.

Role : Testing

- Prepare & execute test conditions
- Test Case Preparation
- Perform test execution in all phases of testing, including functional, regression, usability, UI, integration & acceptance
- Report bugs into the bug tracking system with clear and detailed steps to reproduce
- Requirement/Change request analysis and generate test cases based on the requirements
- Reporting bugs and Retesting the resolved cases

Project 3 : IP Studios

IP Studios is an on-demand video streaming app that allows the users to watch content on their different devices. The streaming service will support iOS, Android mobiles, desktop browsers, Android TV, WebOS and Apple TV. The genre will be kids focused and content of the app will be in Arabic

Role : Testing

- Prepare & execute test conditions
- Test Case Preparation
- Perform test execution in all phases of testing, including functional, regression, usability, UI, integration & acceptance
- Report bugs into the bug tracking system with clear and detailed steps to reproduce
- Requirement/Change request analysis and generate test cases based on the requirements
- Reporting bugs and Retesting the resolved cases

Project 4 : Net Direct Auto Sales

Net Direct Auto Sales is an independently owned and operated, pre-owned dealership that provides the highest quality inventory of specialized lifted vehicles. The application deals with the transportation, inspection, appraisal, online inventory & sales of the automobiles.

Role : Testing

- Preparing Test Plan, Test scenarios
- Prepare & execute test conditions
- Test Case Preparation
- Perform test execution in all phases of testing, including functional, regression, usability, UI, integration & acceptance
- Report bugs into the bug tracking system with clear and detailed steps to reproduce
- Requirement/Change request analysis and generate test cases based on the requirements
- Reporting bugs and Retesting the resolved cases

Education

2011-2015

**Bachelor of Technology, Electronics and Communication, Kerala University -
6.5(CGPA)**
